

Application

As part of this colloquium, young engineers can present student research projects or PhD research papers as well as reports from on-going construction projects. Presentations are held in English. The best presentation will be awarded with a prize valued at 1 000 €. We are looking forward to receiving interesting project descriptions from young engineers under 35 years of age (born 1982 or earlier). Please submit a two-page paper including a short Curriculum Vitae by **31st December 2015**. For more information please check the website at <http://www.iabse.de/YEC2016>.

Young Engineers, IABSE Members, interested professionals from all areas of civil engineering are welcome to attend the colloquium in Hamburg.

Please send your submission via e-mail to YEC2016@iabse.de or upload it via our website.

Submission deadline: **31st December 2015**

The jury consists of representatives from German and Danish universities and industry.

For further questions, please write to our organising committee at YEC2016@iabse.de

Registration

Please register on the website of the German Group of IABSE at <http://www.iabse.de/YEC2016>

Registration fee colloquium: 25,- €
(including lunch, coffee break and colloquium report)

Get-Together including dinner: 20,- €

Technical Walk

It is planned to organise a technical walk on Saturday morning to visit either an interesting construction site or some historic structures. For more information please check the website at <http://www.iabse.de/YEC2016>.

Venue

HafenCity Universität Hamburg
Überseealle 16, 20457 Hamburg
Hörsaal 200

Directions can be found on our website.

Colloquium

Colloquium for Young Engineers

This colloquium offers young engineers the opportunity to present interesting projects from university, research or construction practice to an audience of fellow engineers from the civil engineering sector. It provides attendees with an overview of current research topics as well as challenging construction projects and is an excellent platform to share experiences among young and old.

Message from the President of IABSE Prof. David Nethercot

In our electronic and digital age we sometimes forget the importance of personal interaction, gathering together to share experiences, to learn, to be inspired and to make new friendships. The most successful gatherings usually involve people with common interests and a shared purpose. Hamburg's Young Engineers event, the 3rd of its type to be held in Germany

and which I am delighted to see is a collaborative effort with the Danish Group of IABSE, represents just such an opportunity for the new generation of Structural Engineers. Those who have already committed should feel a little smug at having made a wise investment, those in doubt should decide that participation will be both enjoyable and rewarding and those who have, thus far, not thought that attending was for them should reverse that view so that they do not regret having missed what, on past performance, promises to be a splendid opportunity for personal development, technical updating and fun. April 1st 2016 will soon be here.

Message from the Chair of the German Group of IABSE, Prof. Guido Morgenthal

Following the success of our first two Young Engineers Colloquia we are turning the event into an international format for 2016. I am very excited that the Danish Group of IABSE has agreed to act as co-host, making this a platform for young engineers from both countries and beyond to exchange ideas, to network and to have fun in true IABSE style! It is a pleasure

to invite you to the city of Hamburg and I hope that many young engineers from practice and from academia will contribute to the success of the colloquium by submitting contributions about their work. I look forward to an exciting day in Hamburg!

Schedule

Message from the Chair of the Danish Group of IABSE, Henning Schultz

On 1st April 2016 the German and the Danish National Group of IABSE will be the joint hosts of a colloquium aimed at young engineers. The German National Group has successfully arranged similar events in 2014 and 2015. The 2016 Young Engineers Colloquium (YEC) will mark the first time that such an event is

co-organized by two individual countries and the Danish National Group is proud to be part of this initiative. The 2016 YEC builds on the long history of trade and collaboration between Germany and Denmark and on the strong common engineering tradition. Offering a unique opportunity for young professionals to meet and exchange ideas across borders, the initiative truly reflects the international spirit of IABSE. Students, young engineers and experienced professionals, who act as mentors and beacons of our profession, are warmly welcomed to participate actively in an inspiring day which will serve as an introduction to the vibrant community of IABSE and its activities.

Schedule

Beginning at 10 am

Welcome – *Prof. Guido Morgenthal*

Keynote – *Ian Firth, United Kingdom*

Selected Presentations – Part 1

Lunch

Selected Presentations – Part 2

Short Presentation on IABSE

Introduction to YEP

Award Ceremony and Closing

Closing at 5 pm

Get Together at 6 pm

Impressions from YEC 2015 are available at

Keynote – IABSE YEP Contact

Keynote – Ian Firth

We are pleased to present Ian Firth from the UK as our keynote speaker for the event. Ian is a distinguished engineer and true visionary, who has been responsible for some of the most challenging and most iconic bridge designs in the world. He is the Chief Operating Officer of Flint and Neill (a COWI Company), a large structural engineering consultancy firm based in London. Ian is the Chair of the British Group of IABSE and he has contributed to IABSE through involvement in committees, many contributions to conferences and, perhaps most notably, the organisation of the IABSE Symposium in London in 2011. In his keynote, Ian will present some of his bridge work and address the important role of structural engineers in today's developing world.

IABSE Young Engineers Programme

The IABSE Young Engineers Programme (YEP) offers young engineers a platform inside IABSE to build up and enlarge their professional network as well as share experiences with other young engineers or experienced civil engineers. The Young Engineers Programme is open to all engineers under 35 years of age.
